

LABORATORY – Consultancy

Room 1 - 2 (Biohazard)
Room 2 - 4 (Biohazard, PCR machine, PCR Cabinet + Microscope & Balance)
Room 3 - 2 (Biohazard)

LIR Biotech operates her own laboratory. We have extensive knowledge in laboratory design, integration of hardware, detection platforms and hands-on experience. We understand clearly costs factors and are able to offer turnkey solutions within customer's expectations and needs. The integrated solutions will provide our client a fully operational and functional laboratory.

We have successfully completed a number of turnkey projects in Malaysia, Brunei, Indonesia and Bangladesh especially related to PCR.

FOOD SAFETY – Residue Detection

We provide complete **turnkey ELISA screening solutions** by integration of hardware, detection platforms and technical skills training to ensure a functional and reliable operations.

Hardware & Lab Design

ELISA Reader
Dryer
Centrifuge
Working Consumables

Detection Platforms

Suitable ELISA kits

Technical Skills

ELISA theory
Liquid handling techniques
Results and interpretation
Trouble Shooting

Our advantage :

1. Competitive set-up costs.
2. Good technical support and competency.
3. Training include ELISA theory (principles of competitive ELISA, factors influencing results, Limit of Detection (LOD), Limit of Quantitation (LOQ), CC- α , CC- β).
4. Hands on include liquid handling procedure, washing , results interpretation.
5. **We can separately provide a validation protocol to determine “FIT for USE” to comply with EC/657/2002 Guidelines and Interpretation of Analytical requirements.**
